PRESERVED FLOWER BOUQUETS &
ARRANGEMENTS

Welcome to Zipzap Flowers, your destination for preserved flower bouquets and arrangements that not only exude beauty but also last for a year, with zero maintenance required.

Our flowers are carefully selected at their peak bloom and undergo a distinctive bio-treatment process, replacing water content with natural oils. This innovative approach extends to all foliage and filler flowers, ensuring they also maintain their vibrancy and longevity.

We pride ourselves on combining cutting-edge technology with natural processes to deliver products that are not only stunning for consumers but also environmentally friendly, budget-conscious, and hassle-free.

Our flower bouquets are meticulously hand-arranged and thoughtfully designed to mirror the freshness of cut floral arrangements. With a wide collection of flowers, we ensure that you experience no compromise in quality or variety compared to fresh flower arrangements.

By transitioning to preserved flowers, your business can significantly reduce CO2 emissions from floral décor by up to 90%.

Why Choose Preserved Flowers?

Our preserved flower arrangements are ideal for residential, corporate and the hospitality industry, catering to diverse needs. We have small arrangements perfect for table settings and hotel suites, grand displays for reception areas, and custom designs tailored for home, office, spa, gym, and bar spaces.

With sustainability at the forefront, our arrangements offer eco-friendly floral solutions as they require no water source, minimizing environmental impact.

Enjoy flexibility in maintenance with options to replace arrangements **quarterly**, **bi-annually**, or **annually** according to your preference.

Discover our sample arrangements tailored for:

- α Reception areas
- α Table arrangements
- α Console desk
- α Lounge area
- α Hallways
